## General Information

SABA was chartered in 1980 as a non-profit corporation devoted to the welfare and future of behavior analysis. SABA exists to secure and administer private funds in support of behavior analysis. These activities include, but are not limited to, the advancement of basic knowledge about behavior analysis and the applications of that knowledge to problems of developmental disabilities, and other areas.

SABA supports behavior analysis through both independent projects that it initiates and through underwriting activities of the Association for Behavior Analysis (ABA). The eight Directors of SABA also are members of the Executive Council of ABA.

Gifts of cash, securities, and other property are given absolutely or in trust by individuals, corporations, and foundations for the benefit of behavior analysis. Gifts received through the annual, endowment, and planned giving programs of SABA are used to supplement the activities of ABA and its members beyond the financial support such programs can receive from the ABA membership. The Society's Board of Directors and staff work with both members of ABA and other donors to determine specific programs to be supported with funds received by SABA.

## Advantages of Giving

The Society provides advantages to donors and to behavior analysis because:

- ☐ It is private and non-profit, existing solely for the benefit of behavior analysis.
- ☐ It is directly accountable to the behavior analysis community through its permanent connection with ABA's Executive council.
- ☐ It allocates unrestricted gifts to help advance behavior analysis in areas which otherwise might not be funded.
- ☐ It is flexible in working with donors to see that any specific requests they have will be honored within the guidelines of the Society.
- ☐ Its gifts are tax deductible.
- ☐ Its small size and low overhead ensure that gifts are directed to programs and not to administrative costs.

## Tax Status

As a non-profit organization, SABA is exempt from federal income tax under Section 501 (c)(3) of the 1986 Internal Revenue Code as amended.

Contributions to SABA qualify for tax deductions to the full extent provided by law. The IRS identification number assigned to SABA is 38 2325364.

## Ethical Standards

The Society is deeply committed to the philosophy, science, and practice of behavior analysis and will support only those activities and programs consistent with this commitment. Behavior analysis activities and programs supported by SABA must in turn conform to the ethical guidelines promulgated by the Association for Behavior Analysis. Such programs also must be consistent with the Association's policy on social justice.

The Society safeguards privacy rights and confidential information. The Society neither accepts nor grants favors for the personal gain of any individual, nor does it accept favors where a higher public interest would be violated. The Society avoids actual or apparent conflicts of interest and, if in doubt, seeks guidance from appropriate authorities.

## Amount you wish to contribute:

Although you may contribute any amount, SABA has specified the following general categories of contribution for your convenience.

- ☐ President's Roundtable ..... \$1000
- ☐ Foundation Circle ..... 500
- ☐ Bicentennial Group ..... 200
- ☐ Century Club ..... 100
- ☐ Friend of the Society ..... 50
- ☐ Associate ..... 25

# Instructions for Contributors

## CONTENT OF *THE BEHAVIOR ANALYST*

*The Behavior Analyst* contains general interest articles on theoretical, experimental, and applied topics in behavior analysis. Articles on the past, present, and future of behavior analysis, as well as its relation to other fields, are particularly appropriate for the journal. *The Behavior Analyst* also publishes literature reviews, discussions of previously published work, reinterpretations of published data, and articles on behaviorism as a philosophy that are suitable to the general readership of the journal. Basic and applied experimental studies with original data, as well as technical articles on philosophy, should be submitted elsewhere.

## GUIDELINES FOR SUBMISSION

1. Submit an original and four clear copies of the complete manuscript.
2. The title page of each copy should include only the full title. The author(s) name(s), address(es), and any other identifying information must be omitted.
3. Provide three copies of a separate sheet including (a) any footnotes to the title (e.g., regarding acknowledgments), (b) the proper authorship and affiliation(s), (c) any footnote(s) to author name(s), (d) E-mail address, and (e) a list of at least four to six key words for indexing purposes.
4. You may also provide the names and addresses of three to five people outside of your institution whom you would recommend as qualified reviewers of your manuscript.

## EDITORIAL REVIEW

1. All manuscripts will be considered for suitability for publication in *The Behavior Analyst* by the Editor.
2. Reviewers are not sent the name or the institutional affiliation of the author.
3. Reviewers are selected by the editor handling the manuscript. At least three reviewers are selected, one or

more from the Editorial Board and the remainder selected as guest reviewers appropriate to the manuscript. Reviewer comments will be returned with any marked manuscripts and the editorial decision within approximately three to four months.

## STYLE

1. Use the active voice in preference to the passive voice. The active is usually shorter and more lively to read, and more clearly specifies the agent of action.
2. Be specific rather than general whenever possible. A phrase such as, "We need to arrange contingencies to reinforce desired behaviors" communicates little. Instead, tell who needs to do what so that a reader can visualize the action described.
3. Back up assertions. Statements such as "There is a growing trend in . . ." leave a reader asking "Why do you say that?" Document with examples or data.
4. Avoid overuse of the weak verbs "to be" or "to have" as the main verb of the sentence. Avoid use of indefinite pronouns as the subjects of sentences (e.g., "It is . . .," "This is . . ." or "There are . . .").
5. Refer to the American Psychological Association Publication Manual (4th ed.) for further guidelines regarding manuscript organization, writing and editorial style, references, and typing.

## MANUSCRIPT FORMAT

1. Prepare your manuscript in the form used by the American Psychological Association Publication Manual (4th ed.).
2. Type all sections double-spaced, including title, footnotes, and table headings. Put each table or figure on a labeled separate sheet. DO NOT enclose glossy black and white photographs of figures or illustrations.
3. Only underline words to be set in italics.

## ARTICLES

Articles generally range in length from 15 to 25 double-spaced manuscript pages (excluding references). Include an abstract with the submission.

## ON BOOKS

Suitable length for book reviews and commentary is 10 to 20 double-spaced manuscript pages.

## ON TERMS

A length of two to five double-spaced manuscript pages is suitable.

## IN RESPONSE

We encourage readers to submit comments in response to articles published in

*The Behavior Analyst* or in other journals with which our readers are likely to be familiar. Manuscript copy should not be longer than two double-spaced pages.

## OTHER SUBMISSIONS

If you have something you feel would interest our readers, please submit it even if it does not belong in any of the above categories.

Address manuscripts to:

Psychology Department  
University of Nebraska–Lincoln  
Lincoln, NE 68588-0308

## Does your library subscribe to *The Behavior Analyst* and *Analysis of Verbal Behavior*?

*No? Then give this form to your reference librarian.*

### ***The Behavior Analyst***

*The Behavior Analyst* (ISSN 0738-6729) is the official publication of the Association for Behavior Analysis. It is devoted to the dissemination of information about behavior analysis. As such, *The Behavior Analyst* publishes mainly conceptual and integrative articles, thought it accepts book reviews and other items of general interest to behavior analysts.

If you're not reading *The Behavior Analyst*, you may be missing out of some of the most interesting and valuable information in the field of behavior analysis today. Don't let yourself be underinformed.

### ***Analysis of Verbal Behavior***

If you're interested in a behavioral analysis of verbal behavior, *The Analysis of Verbal Behavior* is the ideal journal for you. No other journal offers this unique contribution to the behavioral literature.

*The Analysis of Verbal Behavior* (ISSN 0880-9401) publishes original papers relevant to the elementary verbal operants, autoclitics, multiple control, private events, rule-governed behavior, epistemology, scientific verbal behavior, language acquisition, language assessment and training, second languages, pedagogy, the verbal behavior of nonhumans, and verbal behavior research methodology.

# *The Analysis of Verbal Behavior*

**Published and distributed by the Association for Behavior Analysis**

You may order any of the back issues of *The Analysis of Verbal Behavior* from ABA. We are currently offering an *incredible* special of \$117 (plus shipping and handling) for a complete set of back issues of AVB (Volumes 1 -13). Quantities are limited. Order your set NOW!

Authors are encouraged to submit original empirical or conceptual papers directly to the Editor [Hank Schlinger, 1215 Wilbraham, Springfield MA 01119]. Papers published in the journal are typically relevant to topics such as the elementary verbal relations (mands, tacts, intraverbals, etc.), multiple control, autoclitics, private events, epistemology, rule-governed behavior, stimulus equivalence, language assessment and training, and verbal behavior of non-humans. Book reviews and responses to previously published papers are also welcome. Specific guidelines for submitting papers can be found on the inside cover of each issue of AVB. All papers will be reviewed by the Editor and selected members of the Editorial Board.

### **The Behavior Analyst: Special Offer**

ABA offers Volumes 1-19 of *The Behavior Analyst* at a special rate. TBA back issues are normally sold at \$10/issue (2 issues/volume) for individuals and \$20/issue for institutions, but now individuals can get all 18 volumes for just \$285. That's a savings of 25%. Furthermore, we are extending this 25% discount to institutional subscribers. That means libraries and other institutions can receive Volumes 1-18 for only \$570.

Please encourage your library to subscribe to *The Behavior Analyst*. Institutional subscriptions are an important source of income for scientific journals. Furthermore, library subscriptions give students and faculty access to otherwise difficult to find back issues and articles. Have your library contact ABA and ask for *The Behavior Analyst*, ISSN 0738-6729.

## - SEPTEMBER 1997 -

**Bryan Roche, Dermot Barnes and Paul M. Smeets.** Incongruous stimulus pairing and conditional discrimination training: Effects on relational responding.

**John Crosbie, April Michele Williams, Kennon A. Lattal, Michelle M. Anderson, and Suzanne M. Brown.** Schedule interactions involving punishment with pigeons and humans.

**Carlos F. Aparicio and William M. Baum.** Comparing locomotion with lever-press travel in an operant simulation of foraging.

**D. E. McMillan, Mi Li, and W. C. Hardwick.** Drug discrimination under a concurrent fixed-interval fixed-interval schedule.

**Grant Schofield and Michael Davison.** Nonstable concurrent choice in pigeons.

## CONTINUING DISCUSSION: HORNE AND LOWE (1996)

### Introduction

### COMMENTARIES

**Steven C. Hayes and Dermot Barnes.** Analyzing derived stimulus relations requires more than the concept of stimulus class.

**Barry Lowenkron.** The role of joint control in the development of naming.

**Ernst L. Moerk.** An archeology of meaning.

**Ronald J. Schusterman, David Kastak, and Colleen J. Reichmuth.** What's in a name? Equivalence by any other name would smell as sweet.

**Murray Sidman.** Equivalence relations.

**François Tonneau and Michel B. C. Sokolowski.** Standard principles, nonstandard data, and unsolved issues.

### REPLY

**Pauline J. Horne and C. Fergus Lowe.** Toward a theory of verbal behavior.

### CODA

**Philip N. Himeline.** How, then, shall we characterize this elephant?
